PRELIMINARY INJUNCTION HEARING
AND THE COURT'S RULING

CHANCERY COURT REPORTERS
500 North King Street
Wilmington, Delaware 19801
(302) 255-0521

1 APPEARANCES:

2 JAMES P. MCEVILLY, III, ESQ.

3 CRAIG J. SPRINGER, ESQ.

4 Faruqi & Faruqi, LLP

5 -and-

6 JUAN E. MONTEVERDE, ESQ.

7 of the New York Bar

8 Faruqi & Faruqi, LLP

9 for Plaintiff

10 BRADLEY R. ARONSTAM, ESQ.

11 S. MICHAEL SIRKIN, ESQ.

12 Seitz Ross Aronstam & Moritz

13 -and-

14 DAVID J. BERGER, ESQ.

15 STEVEN GUGGENHEIM, ESQ.

16 of the California Bar

17 Wilson Sonsini Goodrich & Rosati, P.C.

18 for Defendants Cypress Semiconductor

19 Corporation and Rain Acquisition Corp.

20 BROCK E. CZESCHIN, ESQ.

21 JILLIAN G. REMMING, ESQ.

22 Richards, Layton & Finger, P.A.

23 -and-

24 TAFARI LUMUMBA, ESQ.

of the Colorado Bar

Gibson, Dunn & Crutcher LLP

for Defendants Ramtron International

Corporation, Eric A. Balzer, Theodore J.

Coburn, James E. Doran, William L. George,

William G. Howard and Eric Kuo

- - -

1 THE COURT: Good morning.

2 MR. ARONSTAM: Good morning,
3 Your Honor. Bradley Aronstam on behalf of defendants
4 Cypress and Rain. With me are my co-counsel from
5 Wilson Sonsini, David Berger and Steve Guggenheim.
6 Also with me, my colleague from my firm, Mike Sirkin.

7 THE COURT: All right.

8 MR. CZESCHIN: Brock Czeschin,
9 Richards Layton & Finger, on behalf of Ramtron and the
10 individual defendants. With me in the courtroom is
11 Jill Remming from my office; and my co-counsel, Tafari
12 Lumumba from Gibson Dunn is on the phone.

13 THE COURT: All right. Welcome.

14 MR. McEVILLY: Good morning,
15 Your Honor. Jim McEvilly from Faruqi & Faruqi on
16 behalf of plaintiff, Paul Dent. With me today from my
17 firm are Mr. Juan Monteverde whom Your Honor knows,
18 and Craig Springer from my office also.

19 THE COURT: All right.

20 MR. McEVILLY: Your Honor, may it
21 please the Court, we're here this morning on
22 plaintiff's motion for a preliminary injunction.
23 Plaintiff seeks to enjoin the shareholder meeting
24 scheduled for tomorrow in a transaction entered into

1 in September between Ramtron and Cypress and Rain
2 Acquisition, its wholly owned subsidiary.

3 Cutting right to it, Your Honor, the
4 basis for plaintiff's motion for a preliminary
5 injunction is that the proxy statement that's been
6 issued by the defendants is materially false and
7 misleading. And it's materially false and misleading
8 because it omits information that the minority
9 shareholders need in order to be fully informed in
10 connection with making their decision as to how to
11 vote at tomorrow's meeting and whether or not to
12 exercise their appraisal rights. And the proxy omits
13 any reference whatsoever -- any information whatsoever
14 as to the company's projections.

15 Now, in this context, minority
16 shareholders are no less entitled to be fully informed
17 and to have a fully informed vote and to decide what
18 they're going to do than any other shareholders in any
19 other context.

20 Now, Cypress and the defendants
21 repeatedly tout in their papers that they own
22 approximately 78 percent of the company at this point.
23 They can vote and put the long-form merger through.
24 Therefore, the conclusion follows, at least to them,

1 that the projections somehow are unimportant because
2 this is a foregone conclusion. Well, that's not true,
3 Your Honor. That makes this deal essentially no
4 different than any other transaction involving a
5 controlling or majority shareholder.

6 This is a slightly unusual situation
7 in that Cypress is now the majority and controlling
8 shareholder and wasn't at the time the transaction was
9 proposed. But just because Cypress is in a
10 controlling position right now and can put the
11 transaction through, that doesn't entitle the
12 defendants to disclose whatever it is they please and
13 to deprive minority shareholders of information that's
14 material to their decision.

15 And I think the one thing that
16 distinguishes this case from some of the others cited
17 by defendants in their briefs is that here, we have a
18 complete lack of disclosures. In some other cases,
19 there are situations where some of the projections are
20 disclosed maybe down to the EBITDA level or some other
21 level, or even revenues and costs of goods sold.
22 Here, we have nothing disclosed. Nothing whatsoever.
23 And I think that that is an important fact.

24 We're not quibbling here over the

1 extent to which something should be disclosed. Here,
2 we have a banker's opinion, most of which, at least
3 the DCF, the comparable companies analysis, and also
4 perhaps part of the selected transactions analysis,
5 which, by the banker's own testimony, is premised on
6 projections. And those are two or three legs of the
7 valuation stool that shareholders are being asked to
8 make a decision upon here. And to say that
9 shareholders are not entitled to view any of the
10 projections information that those analyses are
11 premised on and set forth in the proxy just cannot be
12 right, Your Honor, not when information about the
13 projections is just a complete vacuum.

14 Moreover, the defendants also try to
15 point to Plaintiff Dent and his testimony regarding
16 the projections and how he intends to vote on the
17 transaction as though that's somehow pertinent to the
18 materiality decision here before the Court; and it's
19 not, Your Honor.

20 First of all, Mr. Dent was clear in
21 his testimony that he wanted to see projections. He
22 wanted to see the company's next quarter results and
23 the company's 2013 results. And he further testified
24 that he thought it was important for the class to see

1 the projections that the valuation analyses are
2 premised on.

3 Now, the test for whether or not
4 something is material is not whether or not it's
5 subjectively important to any particular shareholder.
6 That would be an untenable standard. It's an
7 objective standard: What is important, what is
8 material to a reasonable shareholder, and does that
9 affect the total mix of information that's out there?

10 In this situation, plaintiff would
11 respectfully assert that not only is any information
12 about the projections material to a reasonable
13 shareholder, but it has to affect the total mix of
14 information, because right now, there's nothing.

15 So as I indicated before, Your Honor,
16 we're not talking about gradations of disclosures
17 about projections of what should or should not be
18 disclosed. We're talking about nothing versus give us
19 information showing us what the projections are about.
20 That's a pretty stark contrast. And I think,
21 certainly when you're talking about the standard that
22 should be applied, it tips everything in our favor.

23 Now, Cypress and the defendants also
24 spent a lot of time and a lot of money and a lot of

1 resources attempting at this point in time, after the
2 fact, to attack the reliability of the projections.
3 And first of all, Your Honor, for Cypress at this
4 point in time, after the fact -- and the reason I
5 point out Cypress is because Cypress is running the
6 show here, as we pointed out in our brief. Cypress is
7 the controlling shareholder. It controls the board
8 six to three.

9 Mr. Richards, the current CFO of
10 Ramtron, was pretty clear that it's Cypress' company
11 at this point as a de facto matter if not de jure. So
12 it's really Cypress who is running the show here.
13 Cypress' attorneys are the ones who are sitting up
14 front. They're the ones that are attacking these
15 projections after the fact. And that simply is not
16 the proper way to go about looking at this.

17 To determine whether or not the
18 projections are reasonable and reliable, we should be
19 looking at the circumstances under which they were
20 created by the people who created them. And back at
21 the time the projections were being created -- it was
22 done in July and August and September based on current
23 information -- company management, the CFO
24 specifically, testified that they did their best to

1 put together reliable projections, projections that
2 could be utilized by the banker. The board asked
3 about the projections and satisfied itself that the
4 projections were a proper basis upon which to make
5 their own decision and to supply to the banker.

6 And the banker testified that they
7 looked at the projections, they vetted them, and that
8 they utilized the projections in connection with their
9 various valuation analyses. And importantly, if they
10 had any reason to think that the projections weren't
11 reliable for that purpose at the time they were
12 created, they wouldn't have used them, which is not an
13 uncommon occurrence.

14 There are times when companies do not
15 do DCF analyses. And presumably, that's because
16 they're having trouble creating projections, they
17 don't want to create projections, whatever the case
18 may be. But there was nobody holding a gun to the
19 head of the board or the banker saying, "You must
20 create a DCF analysis" or "You must create a
21 comparable companies analysis and base it on
22 projections from the company."

23 That was done here. And the reason it
24 was done here was that everybody on the Ramtron side,

1 back when it was still Ramtron, had a Ramtron board,
2 Ramtron management, Ramtron banker, believed that,
3 apparently, if you believe their testimony, that they
4 were putting together projections that could be
5 reasonably relied upon.

6 Now, these projections were
7 contemporaneous. They weren't stale. We're not
8 talking about a case where somebody -- a plaintiff is
9 coming forward now saying, "You should disclose the
10 projections that were created two years ago, and tell
11 us what they were so that we can evaluate this
12 transaction now."

13 We're also not talking about
14 projections that, for any reason plaintiff has to
15 believe now, at least in the context of expedited
16 discovery, and certainly no testimony establishes
17 this, that were created under suspect circumstances or
18 that were manipulated improperly somehow. There is no
19 evidence of that.

20 So --

21 THE COURT: But what we do have is it
22 was disclosed that Needham, the investment banker,
23 relied on the projections, created a DCF, came out
24 with a DCF from 3.57 to 5.01 or something like that,

1 so significantly higher than the \$5 -- or the \$3.10
2 that was the ultimate price. So, you know, the
3 shareholders know that the projections support the --
4 the projections must be more optimistic, more bullish,
5 than what Cypress is offering; and they know those
6 projections are the major input to the DCF.

7 The DCF, they're telling you straight
8 out, it justifies this higher price. And yet they had
9 three other analyses. They concluded ultimately that
10 it was a fair price. Why do the projections
11 themselves have to be disclosed to the shareholders?

12 MR. McEVILLY: Because, Your Honor,
13 otherwise the shareholders have no basis upon which to
14 make any determination as to how accurate or how
15 reliable or whether or not they should be putting --
16 and how much -- credence in what the banker and what
17 the company are saying. If they have no information
18 regarding the projections, the future prospects of the
19 company whatsoever, you're just left with simple
20 conclusions. That is not a fair summary of the
21 banker's work.

22 THE COURT: So what's the best case
23 that you have? Give me the two best cases that you
24 have. Because you're almost arguing for a per se all

1 projections have to be -- if you've got management
2 projections that are relied upon by an investment
3 banker to make an analysis, and especially a DCF
4 analysis, they have to be produced. That seems to be
5 what you're saying.

6 MR. McEVILLY: In this particular
7 context of a cash-out merger, Your Honor, where the
8 company's shareholders are being taken out, and one of
9 the primary bases for the board's recommendation is a
10 banker's fairness opinion utilizing management's best
11 estimates, projections, this is a situation where the
12 projections should be disclosed. And I think --

13 THE COURT: Isn't that, dead on, the
14 Skeen case?

15 MR. McEVILLY: That's not. The Skeen
16 case took place in the context of a motion to dismiss.
17 And the Skeen case also occurred long before a lot of
18 the more recent jurisprudence where the Court has
19 found clearly that projections in certain contexts
20 similar to these should be disclosed.

21 THE COURT: That's what I asked you a
22 minute ago. So the Skeen case is the Supreme Court.
23 The later cases, I think, are the Court of Chancery,
24 which I, of course, still respect as a member of it.

1 What are your two or three best cases
2 that say, in your view, that I have to order these --
3 notwithstanding Skeen, which was a very similar set of
4 facts, I really have to order these projections
5 produced?

6 MR. McEVILLY: I think the two best
7 cases for that purpose, Your Honor, are the Netsmart
8 case in terms of disclosing projections in the context
9 of a cash-out merger and the PLATO Learning case.

10 And especially when you look at PLATO
11 Learning, it wasn't good enough to just disclose some
12 of the projections in the context of a cash-out
13 merger, as here. The Chancellor thought it
14 appropriate that the company disclose the actual cash
15 flows because the cash flows are what you base a
16 discounted cash flow analysis on. And that way,
17 shareholders are able to look at that information and
18 to determine whether or not it makes sense to be
19 cashed out in that situation, or are they going to
20 seek appraisal, or are they going to do something
21 else.

22 So I think those two recent cases
23 really stand for the proposition that you have to
24 disclose projections in the context of a cash-out

1 merger, as you have here. Otherwise, I don't
2 understand how those cases make any sense or are good
3 law in the current context, Your Honor.

4 And they both took place in the
5 context of a PI before the transaction was closed, at
6 a time when something could be done with it, done
7 about it, and an appropriate remedy fashioned. And
8 then the shareholder vote can take place once the
9 projections are disclosed and shareholders have had an
10 opportunity to digest that information.

11 There are a whole raft of cases that
12 say that that is the appropriate way to proceed when
13 material information hasn't been disclosed. And I
14 really, you know --

15 THE COURT: Are you suggesting that
16 the standard is higher on a motion to dismiss or
17 something than the standard would be here?

18 MR. McEVILLY: I'm not saying that --

19 THE COURT: It seems like you're
20 distinguishing Skeen on the basis that it was a motion
21 to dismiss and now we're on a motion for preliminary
22 injunction, and so it should be easier for plaintiff
23 to meet their burden on a motion for a preliminary
24 injunction. I'm usually thinking any conceivable

1 basis for a claim on a motion to dismiss, you've got
2 to have a reasonable likelihood of success here.

3 MR. McEVILLY: I'm not saying that it
4 should be easier, Your Honor. I'm saying that in the
5 current procedural context where we're proceeding on
6 the basis of a preliminary injunction, we're looking
7 to have material information to disclose to
8 shareholders before they vote so that they can make an
9 informed decision. That informs the Court's analysis
10 as to whether or not the projections should be
11 disclosed.

12 I think that that is a proper and an
13 equitable way to analyze this situation. What's the
14 current procedural context? What is the Court in a
15 position to do? And how does that impact things going
16 forward? In fact, that's part of the reason that
17 fashioning injunctive relief in this kind of context
18 is so important, because once you're beyond this
19 context and the deal closes, it becomes very hard if
20 not impossible to undo what's already been done. It's
21 the unscrambling the eggs metaphor.

22 THE COURT: Well, I mean, here,
23 wouldn't we -- I mean, I guess if I denied a
24 preliminary injunction and you chose to pursue, to

1 continue on with the case, and let's say that
2 ultimately, you succeed, or maybe there's
3 clarification on the law and you succeed that there's
4 been improper disclosures here, then wouldn't you have
5 a quasi-appraisal remedy that would be available to
6 you at that point?

7 MR. McEVILLY: I don't know about
8 that, Your Honor. And I don't know that --

9 THE COURT: Why not? Why don't you
10 know?

11 MR. McEVILLY: Well, because the
12 defendants' quasi-appraisal remedy argument rests on
13 Berger versus Pubco.

14 THE COURT: Which is short-form.

15 MR. McEVILLY: And Berger versus Pubco
16 involved a short-form merger. The disclosures came
17 out, and at that point, the transaction closes
18 immediately. There was no opportunity to do anything
19 about the defective disclosure in Berger versus Pubco.
20 I think that's a very important reason.

21 For that reason, because there was no
22 opportunity for anybody to do anything about it
23 beforehand, the quasi-appraisal remedy that comes out
24 of Berger versus Pubco really is not -- really doesn't

1 fit here. And the fact that we are here now, we do
2 have an opportunity and the time to do something about
3 the problem in this case, is all the more reason to do
4 it. Because the Court should be looking to do equity
5 here and to require the company to disclose this
6 information, to clean up the situation. To provide
7 shareholders with the information that they need
8 before they have to make a decision is the right thing
9 to do.

10 There was no such opportunity in
11 Berger versus Pubco. If there had been, and somebody
12 had come in and pointed out that the statutory
13 language in that case regarding appraisal rights was
14 defective, one would think that the Court would jump
15 at the opportunity to fix it instead of having to deal
16 with a quasi-appraisal remedy in the post-close
17 context in that case.

18 So, you know, to say that Berger
19 versus Pubco should be applied to -- should be fitted
20 into this situation where, here, we have disclosures
21 that had taken place well before close, we know
22 exactly what we're fighting over, we know how to
23 remedy it -- it's not as though we're asking the
24 company to go back and renegotiate the merger at this

1 point. There are projections that were prepared. The
2 company has them. They're set forth right in the
3 banker presentations. If the company has to -- if the
4 company is enjoined --

5 THE COURT: They're set forth where?

6 MR. McEVILLY: They're set forth in
7 the company's records and in some of the exhibits that
8 we've sent to the Court, the raw projections. And
9 then the projections are also contained clearly right
10 in the fairness opinion presentation materials that
11 are also an exhibit. So the information, Your Honor,
12 is already there. It's very easy for the company to
13 disclose.

14 If Your Honor granted an injunction
15 today and required the company to disclose those
16 projections, presumably, actually, if they were
17 prepared, they could disclose them almost
18 instantaneously. And all we'd really be talking about
19 is how much time shareholders need to digest that
20 information in order to decide how to vote going
21 forward.

22 THE COURT: All right. And now how
23 much time do you think that should be?

24 MR. McEVILLY: Well, I think based on

1 other cases, in similar situations, for instance, the
2 CVS Caremark case, I think that seven to ten days is
3 probably an appropriate period of time for
4 shareholders to be able to digest that type of
5 information. I don't know if that would be impacted
6 by the fact that this is Thanksgiving week and Black
7 Friday on Friday, but seven to ten days based on the
8 cases that I've seen pertaining to this seems to be a
9 reasonable amount of time to give shareholders time to
10 digest the information.

11 THE COURT: All right.

12 MR. McEVILLY: My very last point,
13 Your Honor, and that is that if what defendants are
14 saying now, after the fact, about the projections is
15 true, that they're unreliable, that the bankers
16 shouldn't have used them to try to value the company,
17 that the board shouldn't have relied upon them --

18 THE COURT: Are the bankers saying
19 that? I mean, it's one thing that Cypress is saying
20 that, and I can push that to the side. Are the
21 bankers before me now saying that those projections
22 were unreliable?

23 MR. McEVILLY: No, not at all,
24 Your Honor.

1 THE COURT: Right. And --

2 MR. McEVILLY: And I'm not suggesting
3 that they are or that the projections are unreliable.

4 THE COURT: All right. Okay. And
5 then management is not before me today -- management
6 unaffected by Cypress is not before me today saying
7 that the projections are unreliable; is that right?

8 MR. McEVILLY: That's correct,
9 Your Honor.

10 THE COURT: Right.

11 MR. McEVILLY: So my only point was
12 that if Your Honor was inclined to credit Cypress'
13 argument that the projections are unreliable, which we
14 respectfully assert that Your Honor shouldn't, then
15 the proxy as it stands now is false and misleading,
16 because it suggests that those projections were
17 reliable and were properly used.

18 THE COURT: Right.

19 MR. McEVILLY: And that can't be the
20 case.

21 So in any event, Your Honor,
22 plaintiffs respectfully request that Your Honor enter
23 an injunction requiring the company to disclose the
24 projections so that shareholders have an opportunity

1 to look at them and assess them for themselves and
2 decide how to vote on this transaction going forward,
3 and decide whether or not to exercise their appraisal
4 rights. And all those things are grounded in
5 decisions of this Court over the past ten years or so.
6 And that's really all I have, Your Honor.

7 THE COURT: Okay. I appreciate it.

8 MR. BERGER: Good morning, Your Honor.
9 May it please the Court.

10 THE COURT: Good morning.

11 MR. BERGER: David Berger from Wilson
12 Sonsini Goodrich & Rosati, counsel for Cypress. First
13 of all, I want to thank the Court for making time. I
14 know the Court has a trial that's waiting next door,
15 and I'll try and be brief in my comments.

16 I understand that the sole legal issue
17 before us is the projections issue, and I'm going to
18 go through that.

19 And I heard my friends on the other
20 side talk about Netsmart, and I'll answer those
21 questions. However, and as we stated in our papers,
22 we believe there are several reasons why the Netsmart
23 and the PLATO Learning cases are very distinguishable
24 and, in fact, Skeen is the appropriate case, Supreme

1 Court direct precedent, on the issue as to why that
2 should be followed.

3 But before I discuss those cases and
4 before I discuss the projections issue, I think from
5 an analytical point of view, there are three specific
6 issues as to why the Court should not even reach the
7 projections issue in this case and why plaintiff's
8 motion should be denied before the Court even reaches
9 the projections issue.

10 First, most importantly, is standing.
11 The plaintiff that we have has admitted that the
12 projections were not necessary for him to determine
13 that the price was too low. And the plaintiff's reply
14 brief tries to deal with this by citing incomplete
15 testimony to support the argument that plaintiff, in
16 fact, needed the projections to -- needs the
17 additional information as additional disclosures. And
18 he cites Pages 61 and 62 of his transcript to come to
19 that conclusion.

20 In fact, what plaintiff misses and
21 fails to disclose is the very next question from the
22 same deposition transcript. It's at Page 62. It
23 begins at Line 8. And my colleague, Mr. Guggenheim,
24 asked plaintiffs the following question, received the

1 following answer.

2 "Question: But you, yourself, didn't
3 need that information" -- the projections -- "because
4 you already knew that the price of 3.10 per share was
5 unfair; is that right?"

6 And the plaintiff answered:

7 "Personally, yes, but when I say that, I'm not
8 necessarily speaking for the class."

9 THE COURT: Right. Do you have any
10 case that throws out a plaintiff on the basis that
11 you're arguing?

12 MR. BERGER: I do.

13 THE COURT: What is the case?

14 MR. BERGER: A couple of them. First
15 would be the In Re Appraisal of Aristotle, which is
16 2012 Westlaw 70654, Delaware Chancery, January 10,
17 2012. And in that case, the Court held, and I'll
18 quote from it: "The petitioners here were not
19 deprived personally of any right to dissent by any of
20 the alleged disclosure inadequacies. They dissented
21 based on what they already knew. To put it simply,
22 the alleged disclosure inadequacies did not in any way
23 impair the petitioner's ability to seek appraisal, yet
24 that is the theory on which they ground their claim."

1 That's exactly what we got here. The
2 plaintiff --

3 THE COURT: But does the Court go on
4 and say, "Therefore, they were inadequate class
5 representatives" or something like that?

6 MR. BERGER: So what it held is that
7 the plaintiffs lacked standing to pursue their claim.

8 THE COURT: All right.

9 MR. BERGER: Another case also is
10 Andra versus Blount, which is 772 A.2d 183, Delaware
11 Chancery Court from 2000. And there again, the Court
12 held that, "The theory of her complaint in this action
13 is that the inadequate disclosures worked injury
14 because they induced stockholders to tender rather
15 than to seek appraisal." But the Court dismissed the
16 claim saying the plaintiff "herself sought appraisal
17 and did not suffer injury of this nature."

18 And again, in there, what the
19 situation was, was plaintiff was seeking an injunction
20 on the basis -- on the lack of disclosures; and the
21 Court found that the plaintiff didn't have standing to
22 raise the alleged lack of disclosures because the
23 disclosures didn't impact the plaintiff's own
24 decision.

1 And it goes back to the fundamental
2 injury, the fundamental question of standing, as to
3 whether or not this plaintiff has suffered any injury.
4 This plaintiff has not, because this plaintiff has
5 already made up his mind as to the adequacy or alleged
6 inadequacy of the 3.10-per-share price. And so
7 because of that, he does not have the ability to claim
8 injury as a result of any alleged disclosure or
9 nondisclosure.

10 The one case that sort of raises the
11 issue that I think Your Honor raised about whether it
12 applies in a class action context is the Marriott
13 decision. And there, there is some dicta to the
14 effect --

15 THE COURT: Since we may have multiple
16 Marriott decisions, can you give me the cite?

17 MR. BERGER: I think I have it in my
18 notes.

19 THE COURT: Sure. Take your time.

20 MR. BERGER: I'll get it for
21 Your Honor in just a minute.

22 THE COURT: Sure.

23 MR. BERGER: It's In Re Marriott, 2000
24 Westlaw 128875, Delaware Chancery, January 24, 2000.

1 And on that, the plaintiff had previously moved to
2 enjoin the transaction on the grounds of unfair price
3 and inadequate disclosures. The Court had denied the
4 motion, but on a motion to dismiss, the Court held
5 because the plaintiff had previously moved for an
6 injunction pending -- to stop the transaction, that
7 there are valid jurisprudential reasons to permit a
8 plaintiff to act as class representative
9 notwithstanding the fact that he was admittedly aware
10 of all or nearly all of the disclosures that he
11 complains were omitted. To rule otherwise would
12 discourage prompt litigation in advance of the
13 conclusion of a transaction.

14 Now, that's obviously not what we have
15 here for two reasons: One, the plaintiff didn't move
16 promptly -- and I'm going to get into that in just a
17 moment -- didn't move promptly in Colorado or with
18 respect to this Court; and second, we're in the second
19 half of a transaction. This plaintiff did not stop or
20 seek to stop the first step of the tender offer. So
21 we're in a different situation, I would submit.

22 THE COURT: They tried to stop the
23 first half of the tender offer. The Court denied
24 that.

1 MR. BERGER: That's correct,
2 Your Honor. But again, that's different than seeking
3 the disclosures at this time.

4 THE COURT: Right.

5 MR. BERGER: So I think Marriott is
6 easily distinguishable. And I think the key point
7 here is that this plaintiff has not been injured by
8 the alleged lack of disclosures. He knows what he's
9 going to do.

10 The second reason for denying the
11 injunction here, again, putting aside the projection
12 issue, is the plaintiff's delay in seeking an
13 injunction. The Court is well aware of case law on
14 the fact that delay in seeking an injunction is, in
15 itself, a basis for denial of the injunction. Here,
16 there's no doubt about the timetable of past events.

17 Plaintiff has known about the
18 disclosures and, in particular, the lack of disclosure
19 or projections at issue in this motion since around
20 the middle of September. As this Court knows,
21 plaintiff waited several weeks, until early October,
22 to file a motion for expedited relief in Colorado.
23 That motion, as this Court knows, was denied in
24 Colorado on October 4th.

1 Now, I know that this Court was not
2 persuaded by the Colorado Court's reasoning to deny
3 expedition here, but I do think that the Court should
4 recognize that plaintiff waited another two and a half
5 weeks between the time of the denial in Colorado on
6 October 4th to bring a motion to expedite here on
7 October 22nd. I'm sorry. The denial in Colorado was
8 October 5th. So between October 5th and October 22nd
9 was the time lag between filing a motion for expedited
10 relief here. And I think that two-and-a-half-week
11 period is a basis for denial of the motion for
12 injunctive reliever.

13 And while plaintiff argues that he did
14 not get a fair hearing in Colorado, an argument that I
15 find a little insulting to the Colorado Court, he
16 offers no reason why he waited the nearly three weeks
17 before seeking expedited relief in this Court.

18 And under well-established precedent,
19 including the cases cited in our brief at 37 and 38,
20 but most noteworthy, the Oliver Press decision as well
21 as the Santa Fe decision, both of those cases would
22 support denying the injunction here just based on the
23 delay of plaintiff in seeking expedited relief in this
24 situation.

1 Third, and I'll be very brief on this
2 issue, but we believe the balance of hardships -- and
3 then I'll move into the injunction -- the balance of
4 hardships here also favors denial of the injunction.

5 Now, we need to be clear that an
6 injunction here causes real hardship. There is
7 hardship to Ramtron and its employees, customers,
8 shareholders. Ramtron has obviously been dealing with
9 tremendous uncertainty in the marketplace the last
10 several months since Cypress' offer became public.
11 This has resulted in substantial uncertainty in its
12 employee and customer base. These are discussed --

13 THE COURT: At this point, it's owned
14 78 percent by Cypress, so what's so uncertain about
15 that?

16 MR. BERGER: Cypress doesn't get the
17 chance to actually take control of the business until
18 the transaction is closed. So what Cypress is doing
19 is it is financially backstopping the business.

20 THE COURT: Because the merger
21 agreement has an "ordinary course" until they have
22 100 percent.

23 MR. BERGER: Correct.

24 And the hardships are in evidence

1 before Your Honor in Mr. Buss's declaration at
2 Paragraph 13 as well as in the testimony of Ramtron's
3 CFO, which is in the prior deposition transcript at
4 73. And it's clear that but for Cypress' support,
5 there would be significant questions if Ramtron could
6 exist today.

7 In contrast, the harm to plaintiff is,
8 we believe, speculative at best. Your Honor raised
9 the issue of the quasi-appraisal remedy. Again, we
10 don't think the information at issue here is material
11 or required to be disclosed, and I'll go through that
12 in a moment. But if you assume arguendo that it is,
13 that provides an adequate remedy, we believe, for
14 plaintiff.

15 THE COURT: Right. So you think that
16 that would be a possible remedy if, in your view, we
17 had the unlikely event of the disclosure ultimately
18 being held inadequate. If that happened, then you
19 think they could get a quasi-appraisal remedy?

20 MR. BERGER: If you assumed,
21 Your Honor -- to answer Your Honor's question, if you
22 assumed that the information was material and it was
23 required to be disclosed, we do believe they could
24 proceed under Steiner under a quasi-appraisal remedy,

1 yes.

2 I'd like to put forward that there
3 isn't a single piece of admissible evidence we have
4 seen in the record to support a claim in which the
5 projections will change the total mix of information
6 in the market, and so we believe that there is no
7 evidence that the disclosures will affect even
8 plaintiff's own decision. And given this, there is
9 simply no factual basis to find any harm to plaintiff
10 from not disclosing the information, the projections
11 at issue.

12 Now I'd like to turn to the
13 projections, and again, I'll try and be brief,
14 Your Honor. Plaintiff obviously has the burden to
15 show whether or not the projections, the information,
16 is material. That's clearly plaintiff's burden here.
17 The key case on point, as Your Honor recognized, is
18 the Skeen case.

19 And Skeen, which is still well-settled
20 good law under the Delaware Supreme Court opinion,
21 makes clear what the standard of review is. I'm
22 quoting from Skeen now at 750 A.2d. 1170. "Omitted
23 facts are not material simply because they might be
24 helpful. To be actionable, there must be a

1 substantial likelihood that the undisclosed
2 information would significantly alter the total mix of
3 information already provided." That's clearly the
4 standard which we're all operating under.

5 There is no evidence -- there are four
6 reasons here why the projections are not material, and
7 I'm going to discuss each in detail, but let me give
8 you a quick summary.

9 First, there is no evidence that the
10 projections were material to the board. The
11 projections were used by Needham. No question about
12 that. We don't dispute that. But this is not a case
13 of professional malpractice. What Needham chose to
14 use to come to its own conclusions about its own
15 fairness opinion -- just because Needham chose to use
16 something does not mean that it was relied upon by the
17 board. And there is no evidence in this record to
18 show that the projections were relied upon by the
19 board, and that's the key issue.

20 This is a breach of fiduciary duty
21 case. This is not a professional malpractice case.
22 And plaintiff does not get to say a per se rule in
23 Delaware exists that merely because something was
24 provided to the financial advisor, that it

1 automatically becomes either material to the board or
2 must be disclosed. That's --

3 THE COURT: But I do have a situation
4 here where we've got projections that were prepared by
5 management in the ordinary course of business. They
6 were supplied to the investment advisor in the context
7 of negotiations about a possible merger. They were
8 relied on by the investment advisor, at least for the
9 DCF analysis that it did to come up with its fairness
10 opinion. And perhaps -- I think they even said they
11 relied on them for at least one of their other
12 analyses. And not a single thing is revealed about
13 the projections themselves. So, you know, stacking
14 that up against cases like Netsmart and PLATO is tough
15 to do.

16 MR. BERGER: Let me take that on
17 directly in two respects, factually and then legally.

18 Factually, the projections, and in
19 particular, the five-year projections, were not done
20 in the ordinary course of business. On this, the
21 testimony is clear. And I'll read from Mr. Richards'
22 transcript. He's the CFO from Ramtron. He was the
23 CFO during all of this time.

24 And in his deposition which plaintiffs

1 took, at Page 16 of his transcript, beginning at Line
2 21, he says -- I'll actually begin at Line 9.

3 "What about management? What does
4 management at Ramtron use the quarterly financial
5 forecast for?

6 "Same thing, plus more detailed stuff
7 like we're going to meet covenants," and he goes on.
8 "Decisions have been made in the past to cut salaries,
9 to lay people off.

10 "And when you refer to 'plan,' are you
11 talking about a five-year annual operating plan?

12 "Answer: No.

13 "What plan are you talking about?

14 "Possibly a three-month operating
15 plan. We don't normally look out, you know, or at
16 least I don't, from a tactical standpoint, look out
17 five years in our industry or our company or any
18 company I have ever been at.

19 "Question: How far does Ramtron
20 typically look out when preparing quarterly financial
21 forecasts?

22 "There is not a hard-and-fast rule on
23 that.

24 "What's the general practice?

1 "Through the quarterly, through the
2 end of the year, possibly the next four quarters."

3 There is no testimony that they
4 normally do five-year forecasts. And in fact, Ramtron
5 does not normally do five-year forecasts. What was
6 done for the financial advisor for the DCF analysis
7 was something specifically done for Needham, and it
8 was not done in the ordinary course of business, and
9 there is no dispute about that.

10 Both on the Netsmart and on the PLATO
11 Learning case, there are a couple of reasons why I
12 think projections there were required to be disclosed
13 that make those cases quite distinct from this case.

14 First, what you had in those cases is
15 both of those cases involved management buyouts where
16 the Court in both cases expressed some skepticism at
17 the process that the management and the board had
18 engaged in in reaching its ultimate conclusions.

19 That's obviously not the case here.
20 This was a hostile bidder. Cypress came forward.
21 Management spent many months trying to fight off or
22 fend off Cypress' bid. And there is no concern that
23 this is some type of sweetheart deal.

24 Underlying the policy, if you will,

1 that I think exists between -- for favoring the
2 disclosure of forecasts is a notion that shareholders
3 should get the opportunity to see, when they're trying
4 to be cashed out, whether or not the management is
5 somehow playing a little fast and loose with the
6 numbers, or the board is playing fast and loose to
7 favor one transaction over another. And to my mind,
8 that's the policy that we're trying to encourage.

9 And certainly, Netsmart and PLATO
10 Learning have sub rosa in them so as to make sure that
11 shareholders get that opportunity when trying to
12 decide whether they should accept a cash-out offer or
13 not and lose control of the company. Those issues,
14 with all due respect, aren't present at all here.

15 Here, first of all, this is a hostile
16 offer. None of the management team or the board will
17 remain with the company afterwards. They obviously
18 sought to fend off this offer as long as possible.

19 Second, there can be no doubt that
20 Ramtron scoured the market and engaged in an extensive
21 process to try and avoid -- or try and find other
22 alternative bidders.

23 Third, with respect to what the board
24 relied upon, when the board decided to sell the

1 company, the proxy discloses that the board, in fact,
2 relied upon a number of factors. Those factors are
3 set forth in Pages 32 to 34 of the proxy. They
4 include such things as the review of strategic
5 alternatives, Ramtron's financial condition and
6 prospects, the board's view that Cypress' offer
7 presented full and fair value, and a number of other
8 things.

9 The board did not say that it was
10 relying upon the projections prepared by management,
11 and particularly the five-year projections that were
12 at issue in this motion, in making its decision.

13 So we would submit that the Netsmart
14 and the PLATO Learning cases are quite factually
15 distinct from this case in that you don't have any of
16 the concerns, and you also don't have the risks that
17 you have in those cases present at all here.

18 And again, the reason that what I
19 think -- and I think Your Honor's question to my
20 friends on the other side really hit the issues
21 squarely. What this case raises is whether or not the
22 Delaware Courts are going to adopt a per se rule
23 requiring disclosure of projections if they're created
24 for the financial advisor. That's what we ultimately

1 come down to here.

2 And frankly, under Skeen, there just
3 isn't -- that isn't what Delaware law is. And
4 Delaware law, I think, takes a much more nuanced
5 approach and looks at each situation individually.
6 And here, we just don't have the type of concerns or
7 indicia that require that information to be disclosed.

8 Again, this is an issue between
9 whether or not to seek appraisal or not. The merger
10 has already been decided upon. And what that means
11 here is that the information that plaintiff is seeking
12 is just additive. It doesn't provide anything new.
13 Because, as Your Honor noted, the most important fact
14 about the DCF analysis is that it suggests a price
15 higher than the merger price. That's what's critical.
16 That's what shareholders need to know. How Needham
17 got to that analysis is not material to the total mix
18 of information. What Needham used in coming to its
19 analysis just doesn't qualify as material under the
20 case law.

21 I'm going to -- I understand
22 Your Honor's view on whether or not the projections
23 are reliable or not. I'm not going to spend any time
24 on that.

1 THE COURT: Yeah. I'm not used to a
2 situation where I get into a sort of an objective
3 analysis of whether they are or are not reliable.

4 MR. BERGER: The only thing I would
5 point out to Your Honor, and I promise I'll pass right
6 on, is -- and this is, to me, the indicia of
7 reliability. When I was looking at the projections,
8 and they're in the record, I looked at the books that
9 Needham provided to the board, because how else are we
10 going to tell; right?

11 And the book that Needham provided to
12 the board in July of 2012 is attached as Exhibit 9 to
13 the prior deposition. That's how it came into the
14 Court's evidence. And the September book, which is
15 the fairness opinion book, is Exhibit 3 to the
16 Richards deposition.

17 What's interesting about these
18 documents is between July and September, the company's
19 performance declined. Not surprisingly, it declined
20 fairly substantially. And yet -- and the projections
21 for the rest of 2012 show a decline. And yet the
22 projections for the out years, the 2013 through 2016,
23 although they show declining, a little bit declining
24 revenues for those years, actually show spectacular

1 growth, more growth, in the September book for the
2 fairness opinion than the July book. So although the
3 results came down in that three-month period, the
4 projections actually increase. I don't know how they
5 got there. There is no record evidence in there. But
6 I think it tells us a lot about whether or not the
7 projections are reliable.

8 And again, if this were a situation
9 where, you know, I was arguing that Ramtron should be
10 forced to drop its pill because these projections were
11 unreliable, I think there be would be an interesting
12 debate on all this stuff. But for our purposes here,
13 I think there is plenty to say that Ramtron's
14 projections are highly questionable, and they
15 certainly don't add anything to the information that's
16 already out there.

17 The final point, and maybe it's just a
18 return to a point I mentioned earlier, but the notion
19 of the projections, they don't add to what is, I
20 submit, already the key point here, which Your Honor
21 noted. The DCF analysis gives the price. That's what
22 shareholders need to know. Under Skeen, that's what
23 shareholders need to know. Other information may be
24 nice to have, but I don't think any of it is material.

1 Unless Your Honor has any questions,
2 I'm through.

3 THE COURT: No. I appreciate it.
4 Thank you.

5 MR. BERGER: Thank you, Your Honor.

6 THE COURT: Mr. Czeschin.

7 MR. CZESCHIN: I would like to note
8 quickly, because there was a lot said, there was a
9 very strong suggestion that Ramtron's management had
10 no concerns with respect to the reliability of the
11 projections. And I don't want to belabor points that
12 have already been made, but I don't know that that's
13 an accurate characterization of the CFO's testimony,
14 who was the CFO at the time of the negotiations.

15 If you look to Pages 70 and 73 through
16 75 of the CFO's transcripts, he clearly explains that
17 he felt the projections were aggressive, and he
18 details why he were thought they were aggressive, and
19 that by the end of the negotiation period, he was
20 having concerns as to whether or not Ramtron would
21 survive as a going concern at all.

22 He further notes later in the
23 deposition, Pages 79 and 93, that projecting all the
24 way out to 2016, which was what was done here for the

1 purposes of providing something to the bankers, in his
2 industry, he felt that was, quote, just crazy and a
3 worthless exercise.

4 So I just wanted to point that out to
5 the Court since there were the comments about
6 Ramtron's management.

7 Thank you, Your Honor.

8 MR. McEVILLY: Your Honor, just a few
9 brief points.

10 One, as to the board relying on the
11 company's projections, if Your Honor were to look at
12 the definitive proxy statement at Page 32, and the
13 board's reasons for recommending the merger, under
14 Ramtron's financial condition and prospects -- that's
15 how it's entitled -- one of the reasons that the board
16 gives for recommending the merger is, the second
17 bullet item down, "Ramtron's prospects for future
18 growth, which involved potential benefits herein, as
19 well as the risks associated with executing its
20 business plan."

21 I don't know that there is any way to
22 read that other than the projected financial
23 performance of the company in the future. They don't
24 use the word "projections," but there is no other way

1 to read that, especially when you consider that the
2 board was involved in this strategic review process
3 and had had a couple of different sets of projections
4 prepared prior to entering into the merger agreement.

5 Now, as far as Mr. Richards' testimony
6 is concerned and the reliability of the projections,
7 in that part of Mr. Richards' testimony that the
8 defendants were just reading into the record,
9 Mr. Richards did say that he thought that some of the
10 sales goals might be a little aggressive. But then he
11 went on to say that he talked to the board about it
12 and the board was comfortable with that. In other
13 words, the board knew all about the projections, had
14 fully vetted them, and was comfortable with the
15 projections that were being provided to the banker.

16 I think when you connect that with
17 what the board is saying in the proxy statement, the
18 notion that the board wasn't fully involved and didn't
19 rely upon the financial projections that they
20 apparently instructed management to prepare -- because
21 the board had to authorize that. The banker isn't the
22 boss of the deal. The banker didn't come in and say,
23 "Management, prepare five-year financial projections
24 for us and be quick about it and make sure they're

1 reliable." The board had to give them that ultimatum.

2 And Mr. Richards' testimony was clear
3 that the board had people who were technologists on
4 it, who had had a lot of experience in the industry.
5 They were comfortable with what was contained in the
6 projections. And they even had separately had
7 Mr. Coburn, who had experience in the investment
8 banking industry, who was looking at some of the
9 assumptions that the bankers used in arriving at their
10 conclusions. So not only was the board looking at the
11 financial forecast that the company itself prepared,
12 they were looking at what the bankers were doing, the
13 bankers' own work product, and deciding for themselves
14 whether or not they thought it was reasonable.

15 So any suggestion that the board
16 didn't know what was going on, this is a board that
17 was blindly relying on what bankers were doing in
18 arriving at a financial opinion about the fairness of
19 the transaction, simply does not hold any water.

20 Now, as far as the plaintiff himself
21 is concerned, I want to circle back to some of
22 Mr. Berger's comments.

23 First of all, the plaintiff wants to
24 see the projections because he has made it clear he's

1 not made up his mind as to whether or not he's going
2 to exercise his appraisal rights yet. He wants to see
3 the projections for that reason, and for the same
4 reason other shareholders in the class presumably
5 would want to see the projections too.

6 Now, whether or not that changes his
7 vote is irrelevant, because I think the standard is
8 clear. We cite the case in our brief, the Simonetti
9 case, that just because information is material and
10 alters the total mix, plaintiff doesn't have to make a
11 showing that it actually changes the outcome of
12 someone's vote in some fashion.

13 And I don't believe that any of the
14 cases that the defendants cite go to a standing issue.
15 Standing, Your Honor, means you're out of court. You
16 couldn't have brought the claims in the first place.
17 The case never existed. And that is not what we have
18 here. This plaintiff is clearly adequate. In fact,
19 in his testimony, he goes to pains to point out that
20 the class is entitled -- the rest of his fellow
21 minority shareholders should want to see these
22 projections and evaluate them for themselves. He's
23 looking out for the class.

24 In at least one of the cases

1 defendants cite, it wasn't even a class action. It
2 was post-close. And the plaintiff in that case was
3 not pursuing claims on behalf of a class. He was
4 pursuing claims on behalf of himself. And when he
5 raised these disclosure issues after the fact and it
6 came out that he hadn't relied on that information
7 himself, the Court dismissed his claim on that basis.
8 That is a different context than what we have here,
9 where we are before the shareholder vote, this is a
10 class action, this is a plaintiff who by his own
11 testimony is clearly doing everything he can to look
12 out for the interests of the class and coming forward
13 and saying, "Projections, that's material
14 information."

15 If you don't get the projections in
16 this context, Your Honor, you're just blindly relying
17 on what the proxy says. It's conclusions. It's not a
18 fair summary to just omit any reference to projections
19 whatsoever. And what makes it especially important in
20 this case --

21 THE COURT: Watch out. It does refer
22 to projections. It omits the projections. So I'll go
23 along with it omits the projections altogether, but it
24 refers to the projections at least a few times.

1 MR. McEVILLY: Yes, Your Honor. It
2 refers to the fact that projections were supplied. I
3 think it has to. Otherwise, there would be no basis
4 for the banker to say much of anything in at least two
5 or three of its analyses. But it gives you no
6 guidance whatsoever as to what those projections were,
7 or, you know, what the magnitude of the projections
8 were.

9 What it does do is it says in the DCF
10 part, the bankers found that the valuation range
11 exceeded the offer price. Well, if you're a
12 shareholder looking at this deal, deciding how you
13 want to vote, and trying to make a decision as to
14 whether or not you want to exercise appraisal rights,
15 don't you want to see those projections to see why the
16 valuation range exceeds the consideration offered in
17 the deal here?

18 If this was a situation where the
19 company was actually going down the drain like
20 Defendant Cypress likes to suggest, you would think
21 that the DCF valuation range would be below what
22 Cypress is offering; that the future prospects for the
23 company would be dim or horrible. We don't have that
24 here.

1 We have a situation where, when you
2 look at the bare conclusions that are made in the
3 definitive proxy, a reasonable shareholder would say,
4 Why aren't they paying me more for my shares? And
5 should I be seeking appraisal under these
6 circumstances? And under that circumstance, that
7 argues more for the projections being disclosed in
8 this particular case, Your Honor.

9 THE COURT: All right. Thank you.

10 MR. BERGER: Do you have time?

11 THE COURT: Okay. Since you've come
12 all the way here. I don't usually do that, but you're
13 taking advantage of me. It's all right.

14 MR. BERGER: Well, in that case,
15 Your Honor, I'll feel real guilty and go real fast,
16 but I'll try not to speak too fast for the reporter
17 who is eyeing me warily. Just two quick points.

18 First, with respect to the standing
19 issue, which I think is critical, the standing has
20 nothing to do with whether he's an adequate class
21 representative or anything. It has to do with the
22 very simple issue of whether this plaintiff or not has
23 suffered injury. That's what then-Vice Chancellor,
24 now Chancellor Strine talked about in the Aristotle

1 case we cited. And here, the plaintiff has not
2 suffered any of injury.

3 And just to read from plaintiff's
4 deposition about the question as to whether or not
5 he's going to seek appraisal, we asked him that
6 question. My colleague Mr. Guggenheim did at Page 69
7 of his deposition transcript.

8 "Is it fair to say that given that you
9 believe that the \$3.10-per-share price is unfair, that
10 you intend to seek appraisal of your shares?

11 "Answer: I don't.

12 "Question: You don't intend to seek
13 appraisal?

14 "Answer: I don't intend to seek
15 appraisal, no, not at this point. I leave it to my
16 legal counsel to decide if that makes any sense.

17 "Question: So the only way you're
18 going to decide whether to seek appraisal or not is
19 through discussions -- and I'm not going to ask you to
20 reveal the substance of those, but the only way you're
21 going to decide is through discussions with your legal
22 counsel?

23 "Answer: That is correct."

24 So this plaintiff has not suffered any

1 injury whatsoever. He knows what he's going to do.
2 He's going to decide --

3 THE COURT: He's going to talk to his
4 counsel. Don't you think his counsel are going to
5 look at all the information that's available to them
6 and his counsel will tell him that he needs to have
7 these projections to make a decision?

8 I've heard enough about the standing.

9 MR. BERGER: Okay.

10 THE COURT: What's your other point?

11 MR. BERGER: Your Honor, I'll sit
12 down. And I appreciate Your Honor's time.

13 THE COURT: I appreciate it.

14 All right. I have a room full of
15 people next door. My plan is to take a lunch break at
16 12:30. I'm going to try to make an oral ruling at
17 1:00, so I'd like people to arrange with my assistant
18 for that.

19 All right. Thank you very much.

20

21

22

23

24

1 (Court resumed at 1:20 p.m.)

2 THE COURT: Be seated, please. All
3 right. Thank you for your patience.

4 In this case, I address a
5 stockholder's request that this Court issue the
6 extraordinary remedy of a preliminary injunction
7 against a stockholder vote on a merger between the
8 company in which the stockholder owns stock and the
9 company's would-be buyer. The stockholder alleges
10 that the company and its directors have failed to
11 provide sufficient disclosures to allow the company's
12 stockholders to make an informed decision on whether
13 to vote in favor of the merger or, instead, to seek
14 appraisal. This is my ruling on plaintiff's motion
15 for a preliminary injunction.

16 The plaintiff, Paul Dent, is an
17 individual who brings this stockholder class action
18 individually and on behalf of all other public
19 stockholders of Ramtron International Corporation,
20 which I'll refer to as "Ramtron" or the "company."
21 Plaintiff is and at all times was an owner of Ramtron
22 common stock.

23 Defendant Ramtron is a Delaware
24 corporation headquartered in Colorado Springs,

1 Colorado. Ramtron designs, develops, and markets
2 specialized semiconductor memory, microcontrollers,
3 and integrated semiconductor solutions, used in many
4 markets for a range of applications in metering,
5 computing and information systems, automotive,
6 communications, consumer and industrial, scientific,
7 and medical markets.

8 Defendants Eric Balzer, Theodore
9 Coburn, James Doran, Jack Saltich, William George,
10 William Howard, and Eric Kuo, the individual
11 defendants, are all members of Ramtron's board of
12 directors. According to defendants' joint brief in
13 opposition to plaintiff's motion, on October 10, 2012,
14 all of the directors resigned from the board except
15 Coburn, Howard, and George.

16 Defendant Cypress Semiconductor
17 Corporation is a Delaware corporation headquartered in
18 San Jose, California. Cypress is alleged to be a
19 world leader in USB controllers, including the
20 high-performance West Bridge solution that allegedly
21 enhances conductivity and performance in multimedia
22 handsets, PCs, and tablets. It also is a world leader
23 in SRAM memories. Cypress serves numerous markets
24 including consumer, mobile handsets, computation, data

1 communications, automotive, industrial, and military.

2 Defendant Rain Acquisition Corporation
3 is a wholly owned subsidiary of Cypress formed to
4 effectuate the proposed buyout.

5 I refer to Cypress, the individual
6 defendants, and Rain collectively as "defendants."

7 This case arises from the following
8 factual background, which, unless otherwise noted, is
9 disclosed in Ramtron's definitive proxy statement
10 filed on October 29, 2012. Again, I'll refer to that
11 as the "proxy."

12 On March 8, 2011, Cypress made an
13 unsolicited proposal to the board to acquire Ramtron
14 for \$3.01 per share in cash. This price represented a
15 37-percent premium over Ramtron's closing price that
16 day. According to plaintiff, the board immediately
17 rejected this proposal.

18 On March 11, 2011, the board convened
19 a telephonic meeting during which it established a
20 strategic transaction committee to assist the board in
21 considering an acquisition by Cypress or another
22 company. During this meeting, the board also
23 authorized the retention of Shearman & Sterling LLP as
24 Ramtron's special legal counsel and Needham & Company

1 as Ramtron's financial advisor.

2 The board rejected Cypress's offer in
3 a March 22, 2011 letter. According to plaintiff's
4 verified and amended class action complaint, which
5 I'll refer to as the "complaint," and I am referring
6 to the complaint in this Delaware action, Ramtron then
7 sold nearly 20 percent of its stock at a net price of
8 \$1.79 per share.

9 On June 22, 2012, Cypress publicly
10 announced a proposal to acquire all outstanding shares
11 of the company for \$2.48 per share.

12 On June 18, Ramtron filed a
13 Recommendation Statement on Schedule 14D-9
14 recommending that its stockholders not tender their
15 shares to Cypress. On the same day, Ramtron issued a
16 press release rejecting Cypress's offer as inadequate
17 and announced the board's decision to explore
18 strategic alternatives. The proxy states that "in
19 connection with this strategic alternative review
20 process, Ramtron, with the assistance of its financial
21 advisor, contacted 24 companies, entered into seven
22 confidentiality agreements with interested parties
23 (including Cypress) and provided due diligence
24 materials to the interested parties."

1 On June 21, 2012, Cypress publicly
2 announced a revised proposal to acquire all
3 outstanding shares of the company for \$2.68 per share.
4 Ramtron again recommended that the stockholders reject
5 Cypress's offer.

6 Cypress renewed that offer on July 20,
7 August 6 and August 20, 2012.

8 In an August 3, 2012 letter to the
9 board, Cypress stated that it was willing to maintain
10 its offer of \$2.68 despite Ramtron's ongoing weak
11 performance. The letter also expressed Cypress's
12 willingness to proceed without access to Ramtron's
13 confidential information, but stated that, at
14 Ramtron's request, Cypress had marked up a proposed
15 confidentiality agreement.

16 In that regard, Cypress further stated
17 that: "we will not have our hands tied just so that
18 you can provide us with management projections, which
19 we do not need and believe are inherently unreliable
20 given both the nature of the industry and Ramtron's
21 record of missing three of the last four years of its
22 own earnings guidance. "And that quote appears in the
23 proxy that has been circulated in connection with the
24 meeting scheduled for tomorrow.

1 The August 3 letter also stated that
2 Cypress "share[d] the growing frustration of many of
3 [Ramtron's] other stockholders," regarding several
4 unanswered questions, including "Why hasn't the board
5 given Ramtron's stockholders the opportunity to assess
6 the reasonableness of the company's projections for
7 themselves?" and "Did the board and its advisors rely
8 upon projections last year when [Cypress's] prior
9 acquisition proposal was rejected and, if so, how do
10 they compare to Ramtron's actual results?"

11 Despite its expressed frustrations,
12 Cypress raised its offer to \$2.88 per share on
13 August 27, 2012. As with Cypress's prior offers, this
14 offer was not conditioned on financing, due diligence,
15 or access to Ramtron's confidential information or
16 financial projections.

17 On August 28, Ramtron filed a second
18 amendment to its July 5, 2012 Recommendation Statement
19 again recommending that its stockholders not tender
20 their shares.

21 On September 8, the board rejected the
22 offer of \$2.88 per share.

23 According to the proxy, the board and
24 Cypress began to negotiate on or after September 8,

1 2012.

2 On September 13, the board instructed
3 Needham to present Cypress's financial advisor,
4 Greenhill & Co., LLC, with a counter-proposal of \$3.50
5 per share. Cypress rejected this proposal, however,
6 and the board made another counter-proposal at \$3.25
7 per share. Although Cypress again rejected that
8 counter-proposal, it upped its offer to \$3.01 per
9 share. After further negotiations, Cypress finally
10 agreed to an offer price of \$3.10 per share
11 conditioned on a termination fee of \$5 million.

12 On September 18, 2012, the Ramtron
13 board convened a meeting with Needham and Shearman &
14 Sterling. At this meeting, Needham -- and this is a
15 lengthy quote -- "discussed with [Ramtron's] [board]
16 their financial analyses of the proposed offer price
17 of \$3.10 per share of common stock and indicated to
18 [Ramtron's] [board] that, based on the current draft
19 of the merger agreement, [Needham] was in a position
20 to deliver an opinion as to the fairness, from a
21 financial point of view, of the \$3.10 per share of
22 common stock consideration to be paid to holders of
23 shares (other than Cypress, Purchaser and their
24 respective affiliates) pursuant to the merger

1 agreement."

2 That same day, Needham delivered its
3 written fairness opinion to the board. In it, Needham
4 opined that "the offer and merger and the merger
5 pursuant to the merger agreement was fair, from a
6 financial point of view, to [Ramtron stockholders]."
7 The board voted unanimously to recommend that Ramtron
8 stockholders accept the \$3.10 per share offer and
9 tender their shares.

10 The next day, September 19, Cypress
11 and Ramtron publicly announced that they had entered
12 into a merger agreement.

13 Under the merger agreement, Cypress
14 would acquire Ramtron through a two-step process.
15 First, Cypress would make a tender offer for all
16 outstanding shares of Ramtron's common stock at \$3.10
17 per share. Second, Cypress, through its wholly owned
18 subsidiary Rain, would merge with Ramtron. The
19 remaining stockholders of Ramtron would receive \$3.10
20 per share in cash.

21 Cypress's initial tender offer expired
22 on October 9. After acquiring only approximately
23 72 percent of Ramtron's outstanding stock, Cypress
24 commenced a subsequent offering that expired on

1 October 17.

2 Cypress currently holds approximately
3 78 percent of Ramtron's outstanding shares. This is
4 enough to make the merger a foregone conclusion but
5 not enough to exercise the merger agreement's top-up
6 option, which requires that Cypress have secured more
7 than 86 percent of Ramtron's outstanding shares.

8 Unable to exercise the top-up option
9 in the tender offer, Cypress has decided to pursue a
10 long-form merger under 8 Del. C., Section 251. The
11 stockholder vote on the merger is scheduled to take
12 place tomorrow, November 20, 2012, at 8:00 a.m.
13 Pacific time.

14 Turning to the procedural history of
15 this dispute, plaintiff first challenged Ramtron's
16 dealings with Cypress in a Colorado state court.
17 Plaintiff filed its first complaint there on June 19,
18 2012. In that complaint, plaintiff claimed that the
19 individual defendants breached their fiduciary duties
20 by refusing to engage in negotiations with Cypress.

21 After Cypress and Ramtron's public
22 announcement of the proposed buyout on September 19,
23 and Ramtron's filing of its Recommendation Statement
24 on September 25, plaintiff amended his complaint in

1 Colorado on September 28 to challenge the proposed
2 buyout. Plaintiff also moved for a temporary
3 restraining order on October 4.

4 On October 5, 2012, the Colorado court
5 denied plaintiff's motion in a one-paragraph ruling
6 which stated, among other things, that plaintiff "has
7 waited over three months' time to make this request to
8 the Court when plaintiff has had knowledge of the
9 circumstances regarding the tender offer and merger
10 agreement well in advance of today's date."

11 Plaintiff Dent filed this class action
12 complaint in Delaware on October 15, 2012, ten days
13 after losing the preliminary injunction application in
14 Colorado. On October 22, plaintiff filed an amended
15 complaint. Plaintiff moved to expedite these
16 proceedings on October 23, and sought a preliminary
17 injunction on November 5.

18 On the afternoon of November 5, I
19 heard oral argument on, and granted, plaintiff's
20 motion for expedited proceedings. Since then, the
21 parties have engaged in discovery. Ramtron and
22 Needham have produced documents to plaintiff including
23 board minutes, bankers' books, projections, and
24 financial analyses. Plaintiff has taken depositions

1 of Gery Richards, Ramtron's chief financial officer
2 and of John Prior, Needham's president and chief
3 executive officer. Defendants have taken plaintiff's
4 deposition.

5 This morning, November 19, 2012, I
6 heard oral argument on plaintiff's motion for a
7 preliminary injunction, and on the basis of all of
8 these materials, make the ruling that follows:

9 The complaint states two causes of
10 action. The first claim is for breach of fiduciary
11 duties against the individual defendants and the
12 second claim is for aiding and abetting a breach of
13 fiduciary duties against defendants Cypress and Rain.
14 Defendant Ramtron is named as a necessary party.

15 The complaint contains several
16 allegations, such as that the board utterly failed to
17 negotiate with Cypress and to shop the company in an
18 adequate sales process, and that the terms of the
19 merger agreement contained preclusive deal protection
20 devices.

21 Plaintiff's main claim, however, is
22 that defendants breached the fiduciary duty of candor
23 by failing to disclose Ramtron's management's
24 financial projections that covered the second half of

1 2012 and the years 2013 through 2016.

2 Ramtron provided these financial
3 projections to Needham and the projections formed the
4 basis for Needham's discounted cash flow or DCF
5 analysis which yielded an implied per share value of
6 Ramtron's common stock equity in a range of \$3.57 to
7 \$5.01. Defendants, however, have not shared these
8 projections with stockholders.

9 Plaintiff asks this Court to enjoin
10 the stockholder vote on the merger between Ramtron and
11 Cypress until defendants have disclosed all material
12 information concerning the proposed merger, including,
13 specifically, management's financial projections.

14 Defendants counter that management's
15 projections are neither accurate nor reliable.
16 Defendants claim that they are not required to
17 disclose these projections because the projections are
18 not material and disclosure of the projections would
19 create a greater risk of confusing Ramtron's
20 stockholders than informing them on whether to accept
21 the \$3.10 offer price or to seek appraisal.

22 To support their contention that these
23 projections are not material, defendants make several
24 points. First, they emphasize that Cypress did not

1 have access to Ramtron's financial projections when it
2 decided to enter the merger agreement. Indeed, as
3 disclosed in the proxy, Cypress noted at least once in
4 an August 3 letter that it found management's
5 projections to be "inherently unreliable."

6 Second, defendants argue that
7 approximately 75 percent of Ramtron's stockholders did
8 not find the lack of projections in the proxy to be
9 significant because they tendered their shares to
10 Cypress without those projections.

11 Third, defendants note that they
12 disclosed Needham's financial analyses, the summary of
13 which fills six single-spaced pages in the proxy and
14 conspicuously provides that the DCF analysis yielded
15 an equity value between \$3.57 and \$5.01 per share as
16 compared to the merger consideration of \$3.10 per
17 share.

18 Fourth, defendants assert that
19 plaintiff does not need the projections to decide
20 whether to tender his shares because he admits that he
21 has already determined that the \$3.10 offer price is
22 too low.

23 Defendants also emphasize that
24 approval of the merger is not in doubt because after

1 the two tender offers, Cypress owns 78 percent of
2 Ramtron's outstanding stock. They further stress that
3 no other bidder ever materialized, even though the
4 board engaged in a lengthy exploration of strategic
5 alternatives and contacted 24 companies.

6 Defendants further contend that, in
7 any case, plaintiff lacks standing to bring this class
8 action. Plaintiff, defendants assert, already has
9 decided to vote against the proposed merger and to
10 pursue an appraisal. Because the additional
11 disclosures plaintiff seeks will have no impact on his
12 decision, defendants apparently contend that plaintiff
13 will suffer no injury from the alleged disclosure
14 violation.

15 Turning to my analysis, this Court has
16 broad discretion in granting or denying a preliminary
17 injunction. The moving party must demonstrate each of
18 the following three elements: First, a reasonable
19 probability of success on the merits at a final
20 hearing; second, an imminent threat of irreparable
21 harm; and third, a balance of the equities that tips
22 in favor of the issuance of the requested relief.

23 The moving party bears a considerable
24 burden in establishing each of these necessary

1 elements. Plaintiffs may not merely show that a
2 dispute exists and that the plaintiffs might be
3 injured; rather, plaintiffs must establish clearly
4 each element because injunctive relief will never be
5 granted unless earned. However, there is no steadfast
6 formula for the relative weight each deserves.
7 Accordingly, a strong demonstration as to one element
8 may serve to overcome a marginal demonstration of
9 another.

10 Moreover, preliminary injunctive
11 relief should not be granted if the injury may be
12 adequately compensated for after a full trial on the
13 merits, either by an award of damages or by some other
14 form of equitable relief. The injury must be of such
15 a nature that no fair and reasonable redress may be
16 had in a court of law and that to refuse the
17 injunction would be a denial of justice.

18 Preliminarily, I briefly address
19 defendants' arguments that plaintiff lacks standing to
20 bring this claim. Defendants argue based on the
21 discovery taken that plaintiff lacks standing because
22 he stated that he believes the \$3.10 per share price
23 is too low, even without access to management's
24 projections, and that he already has decided not to

1 seek appraisal. Defendants refer the Court to the
2 following language from Dent's deposition. And here,
3 I'm quoting:

4 "Question: Is it fair to say that
5 given that you believe that the \$3.10 price is unfair
6 that you intend to seek appraisal of your shares?

7 "Answer: I don't.

8 "Question: You don't intend to seek
9 appraisal?

10 "Answer: I don't intend to seek
11 appraisal, no, not at this point. I leave it to my
12 legal counsel to decide if that makes sense.

13 "Question: So the only way you're
14 going to decide whether to seek appraisal or not is
15 through discussions ... with your legal counsel?

16 "Answer: That is correct.

17 "Question: And are you aware that
18 there's a shareholder vote that's currently set for
19 the merger for November 20?

20 "Answer: Yes.

21 "Question: Do you intend to vote for
22 or against the merger?

23 "Answer: Against."

24 Dent's testimony regarding his intent

1 to seek appraisal is inconclusive in my view. Dent
2 specifically states that he "leave[s] it to his legal
3 counsel" to decide if not seeking appraisal makes
4 sense.

5 At this preliminary stage, I am not
6 persuaded that Dent will suffer no harm or that he is
7 an inadequate class representative under the
8 applicable case law. Accordingly, I do not base my
9 ruling on a finding that Dent lacks standing.

10 Turning to the requirements for
11 preliminary injunction, the first is a reasonable
12 probability of success on the merits. Plaintiff's
13 main contention is that the board reached its duty of
14 complete candor by failing to include in the proxy
15 Ramtron's management-prepared projections upon which
16 the financial advisors relied. Accordingly, the first
17 element that plaintiff must prove is that he has a
18 reasonable probability of success in demonstrating
19 that the failure to disclose these projections
20 constitutes a breach of the board's duty of
21 disclosure.

22 The duty of disclosure is a specific
23 application of a corporate directors' fiduciary duties
24 of care and loyalty. This duty requires directors to

1 disclose fully and fairly all material information
2 within the board's control when it seeks shareholder
3 action. In duty of disclosure cases, the issue is
4 whether shareholders have been provided with
5 appropriate information upon which an informed choice
6 on a matter of fundamental corporate importance may be
7 made.

8 Because the considerations to which
9 the business judgment rule originally responded are
10 not present in the shareholder voting context, this
11 Court does not defer to directors' judgment about what
12 information is material, or at least ordinarily it
13 does not, but determines materiality for itself from
14 the record at the particular stage of a case when the
15 issue arises.

16 An omitted fact is material if there
17 is a substantial likelihood that a reasonable
18 shareholder would consider it important in deciding
19 how to vote. Moreover, an omitted fact that otherwise
20 might not be material may become material where the
21 omission renders the partially disclosed information
22 materially misleading.

23 Once defendants travel down the road
24 of partial disclosure, they have an obligation to

1 provide stockholders with an accurate, full, and fair
2 characterization of whatever they disclose. As
3 defendants point out, Delaware law does not require
4 the disclosure of inherently unreliable or speculative
5 information which would tend to confuse stockholders
6 or inundate them with an overload of information.

7 The omitted disclosure at issue in
8 this case is Ramtron management's financial
9 projections. "There is no per se duty to disclose
10 financial projections furnished to and relied upon by
11 an investment banker. To be a subject of mandated
12 disclosure, the projections must be material in the
13 context of the specific case." That statement of the
14 law comes from *McMillan v. Intercargo Corp.* from the
15 Delaware Court of Chancery in May of 1999.

16 In this case, the evidence
17 demonstrates that the projections are not material.
18 Here, as in the Delaware Supreme Court case *Skeen v.*
19 *Jo-Ann Stores, Inc.*, there are no facts suggesting
20 that the undisclosed information is inconsistent with,
21 or otherwise significantly differs from, the disclosed
22 information.

23 For example, the proxy discloses that
24 in addition to a DCF analysis, the financial advisor,

1 Needham, performed a selected company analysis, a
2 selected transaction analysis, and a stock price
3 premium analysis. These three analyses indicate that
4 a merger at \$3.10 is within a reasonable range, if not
5 on the high side of a reasonable range of merger
6 prices. The DCF, by contrast, values the company at
7 between \$3.57 and \$5.01 per share. The proxy
8 expressly states that the DCF analysis was "based on
9 Ramtron's management's forecasts."

10 A reasonable inference from these
11 disclosed data points is that management's projections
12 are relatively optimistic, but were considered by the
13 individual defendants, that is, the board, and
14 Needham.

15 Furthermore, the board continuously
16 rejected Cypress's offers and attempted to obtain a
17 price of \$3.50 per share, which is roughly at the low
18 end of the price range supported by the Ramtron DCF
19 that was performed by Needham. The proxy further
20 discloses that the only bidder, Cypress, rejected that
21 offer as well as a later Ramtron proposal of \$3.25 per
22 share.

23 The two cases cited and primarily
24 relied upon by plaintiff for a contrary conclusion and

1 to demonstrate that management projections are
2 material are Maric Capital Master Fund, Ltd. v. PLATO
3 Learning, Inc. and In Re Netsmart-Technologies Inc.
4 Shareholders Litigation.

5 These cases in my view, however, do
6 not compel a different result in the circumstances of
7 this case. I have looked at each of those cases
8 carefully and believe that there are factual
9 distinctions between those cases and the situation
10 before me, and that when this case and the proxy
11 disclosures are viewed in context of all the
12 circumstances, that there has not been a showing here
13 that the management projections are material and that
14 it is necessary that they be disclosed in some form of
15 supplemental proxy in this case.

16 Accordingly, plaintiff has not shown
17 that the class is reasonably likely to succeed in
18 proving the merits of its disclosure claim. The
19 stockholders have received sufficient information from
20 which they can deduce that management's forecasts
21 support a price higher than \$3.10 per share. The
22 record nevertheless demonstrates that, notwithstanding
23 management's relatively bullish forecasts, the other
24 metrics that were studied by the investment advisor

1 make the \$3.10 per share price supportable.

2 For example, Needham performed three
3 other financial analyses that place \$3.10 in a
4 reasonable range; no other company expressed interest
5 in buying Ramtron at any price; and others in the
6 industry, including Cypress, Ramtron management, and
7 one of the few analysts covering Ramtron, recently
8 have expressed -- recently, when I say that, I mean
9 back in the time period that's relevant to the proxy
10 statement -- have expressed skepticism about the
11 accuracy of forecasts in this industry, the industry
12 that's before me, generally, semiconductors, and by
13 Ramtron's management in particular.

14 Defendants further contend that
15 Ramtron management's projections are immaterial
16 because they are unreliable. To support this
17 contention, they note that Cypress considered the
18 projections to be "inherently unreliable" and did not
19 care to use them to support its continued offers to
20 buy Ramtron.

21 In addition, defendant's expert,
22 Professor John Coates from Harvard, explains in his
23 expert report that between October 2011 and June 2012,
24 Ramtron repeatedly failed to achieve its public

1 guidance and also its internal projections.

2 On July 24, 2012, Ramtron publicly
3 announced that because of "limited near-term
4 visibility," the company no longer would provide
5 annual guidance but would give guidance only for the
6 next reported quarter. And by the end of the second
7 quarter of 2012, there was not a single firm providing
8 guidance for or forecasting the company's future
9 results.

10 There is evidence, however, that
11 management's projections were not necessarily
12 unreliable. In preparing its fairness opinion,
13 Needham accepted the projections and used them in its
14 analyses of the company. Additionally, during
15 negotiations with Cypress, management attempted to
16 obtain a price of \$3.50 per share, presumably based in
17 part on management's projections. The board's
18 negotiations with Cypress indicate, again, consistent
19 with management's projections and the DCF performed by
20 Needham, that the board believed a higher price than
21 \$3.10 was justified.

22 In this case, however, the materiality
23 of management's projections does not turn on whether
24 those projections were reliable or unreliable.

1 Rather, the question is whether there is a -- and this
2 is taken from the Supreme Court's decision in Skeen v.
3 Jo-Ann Stores, Inc. -- the question is whether there
4 is "a substantial likelihood that the undisclosed
5 information would significantly alter the total mix of
6 information already provided."

7 I find that plaintiff has not
8 demonstrated a reasonable likelihood of success in
9 proving that that is the case here. Stated another
10 way, it is unlikely that a reasonable stockholder
11 would find the projections to be important as opposed
12 to merely helpful in deciding how to vote on the
13 merger or whether to seek appraisal.

14 Turning very briefly to irreparable
15 harm, under Delaware law, the threat of an uninformed
16 stockholder vote constitutes irreparable harm. It is
17 appropriate for the Court to address material
18 disclosure problems through the issuance of a
19 preliminary injunction that persists until the
20 problems are corrected. An example of that is the ODS
21 Technologies v. Marshall case.

22 According to plaintiff, the
23 stockholder vote scheduled to take place tomorrow will
24 be uninformed because stockholders do not have all

1 material information necessary to make an informed
2 decision. This harm can be remedied, plaintiff
3 argues, by a preliminary injunction that briefly
4 defers the stockholder vote until an appropriate
5 supplemental disclosure can be made.

6 Defendants counter that plaintiff
7 cannot demonstrate irreparable harm for three reasons:
8 First, plaintiff has failed to establish a disclosure
9 violation; second, plaintiff's alleged harm is
10 speculative; and third, any harm may be addressed
11 through the quasi-appraisal remedy.

12 As discussed above, I find that
13 plaintiff has not demonstrated that he is likely to
14 succeed in proving that defendants failed to disclose
15 material information. The disclosure of management's
16 financial projections may be helpful to plaintiff, but
17 that alone is not sufficient.

18 Based on the entirety of the proxy, it
19 appears that defendants have provided stockholders
20 with the information they need to make an informed
21 vote. Therefore, I conclude that plaintiff will not
22 suffer irreparable harm if injunctive relief is denied
23 in the sense that plaintiff supposedly would be
24 required to make an uninformed stockholder vote.

1 Turning now to the balance of the
2 equities, plaintiff has not demonstrated a likelihood
3 of success on the merits of his disclosure claim, as I
4 noted. Even if he had, however, the showing would be
5 marginal at best. In these circumstances, plaintiff
6 would not suffer irreparable harm even if this Court's
7 evaluation of the disclosure claims is mistaken and he
8 tenders his shares based on inadequate disclosures.
9 That is because if plaintiff ultimately succeeds in
10 demonstrating that the disclosures were materially
11 deficient, plaintiff can pursue a quasi-appraisal
12 remedy.

13 This Court has expressed a preference
14 for addressing disclosure deficiencies in advance of a
15 stockholder vote, and it is on that basis that I
16 granted the motion to expedite in this instance and
17 heard this preliminary injunction hearing today on
18 very short notice to all involved.

19 For example, Chancellor Allen stated
20 in *Steiner v. Sizzler Restaurants, Inc.*, that "Where
21 complete, corrected disclosure can be made before
22 corporate action is taken, the cost and inherent risk
23 of error that unavoidably accompanies ...
24 'quasi-appraisal' calculation is avoided. Thus

1 corrective disclosure ... is a favored remedy."

2 In Steiner, however, the Court noted
3 that where, as in this case, plaintiff's disclosure
4 claims were not strong, a preliminary injunction was
5 not warranted based on the existence of an
6 alternative, if in some respects less attractive,
7 remedy.

8 In this case, where plaintiff's claims
9 are weak or nonexistent on the merits, the
10 availability of an alternative remedy means that the
11 potential harm to plaintiff, if an injunction ends up
12 being denied improvidently, would be relatively small,
13 in my view.

14 Conversely, if this Court enjoined the
15 stockholder vote, defendants as well as Ramtron and
16 Cypress's respective customers, employees, and
17 stockholders would face several potential harms. No
18 other interested buyer for Ramtron has emerged.
19 Cypress's offer represents a 71.3-percent premium over
20 Ramtron's closing price on June 11, 2012. That was
21 the last trading day before the first public
22 announcement of Cypress's offer to acquire Ramtron.
23 Although defendants do not argue that the deal is at
24 risk if the stockholder vote is delayed, they do

1 contend that they will suffer harm from the
2 uncertainty surrounding an announced but unconsummated
3 merger.

4 At this time, Cypress has de jure but
5 not de facto control over the company. Under the
6 merger agreement, for example, Cypress is unable to
7 cause Ramtron to make any changes outside of Ramtron's
8 ordinary course of business. Furthermore, Ramtron's
9 chief executive officer, Gery Richards, stated in his
10 deposition that he was concerned that Cypress would
11 walk away from the deal and that, if it had, then
12 maybe Ramtron would not have been able to continue as
13 a going concern.

14 Enjoining the stockholder vote,
15 therefore, would delay Cypress's ability to exercise
16 control over Ramtron's business and operations at a
17 time when the company is performing below expectations
18 and may face some level of distress.

19 Based on these facts, the balance of
20 the equities weighs slightly in favor of this Court
21 staying its hand and allowing the shareholders to be
22 heard on the merits of this transaction, especially
23 given the tempering power of the appraisal remedy, as
24 was noted in the Louisiana Municipal Police Employees

1 Retirement System v. Crawford case from Chancery in
2 2007.

3 So for all of those reasons, I deny
4 the plaintiff's motion for a preliminary injunction,
5 and so order.

6 Thank you very much.

CERTIFICATE

I, JEANNE CAHILL, Official Court Reporter for the Court of Chancery of the State of Delaware, do hereby certify that the foregoing pages numbered 3 through 79 contain a true and correct transcription of the proceedings as stenographically reported by me at the hearing in the above cause before the Vice Chancellor of the State of Delaware, on the date therein indicated.

IN WITNESS WHEREOF I have hereunto set my hand this 19th day of November, 2012.

/s/ Jeanne Cahill

Official Court Reporter
of the Chancery Court
State of Delaware

Certificate Number: 160-PS
Expiration: Permanent
